Health Plan Coverages

- (F)** indicates a formulary medication
- indicates a formulary medication that requires prior authorization, step therapy or has quantity or age limits
- (FPA)** indicates a non-formulary medication that requires prior authorization, step therapy or has quantity or age limits
- (NPA)** indicates a non-formulary medication
- (NF)** indicates a non-formulary medication
- (B) (G)** indicates coverage of brand-drug or generic-drug only
- (QL)** quantity limits apply
- indicates this medication is covered under medical benefit and not pharmacy benefit
- (MEDICAL)**

For many health plans, if a generic equivalent is available, the brand name drug may not be a covered benefit. The generic equivalent will be dispensed.

You may need to consult with the health plan's formulary for additional information. The information listed is accurate as of the date of printing of this Pocket Guide. This information has been obtained from the health plan or their websites.
